SECRET

TCS-12159-62
18 May 1962

Copy 1

MEMORANDUM FOR: Operations Officer, NPIC
THROUGH: Chief, Data Management Division, NPIC
SUBJECT: Downgrading of Photography on Hainan Island
REFERENCE: COMOR D-22/10, TCS-12141-62, dated 14 May 1962

50X1

1. Referenced paper recommends to the USIB the downgrading of selected frames of photography on four TALENT missions covering Hainan Island and that all future coverage be downgraded in accordance with the procedures set forth in COMOR D-15/2.

2. The physical downgrading of TALENT photography is time consuming, expensive and through progressive photographic steps much detail is lost. In order that these problems be minimized and the photography on Hainan Island be made available to the Community in a more expeditious manner, it is suggested that consideration be given to titling initially that portion of future missions covering Hainan Island SECRET

50X1

I feel that if this procedure is adapted better quality photography could be provided non-TALENT cleared individuals on a more timely and expeditious basis and would in no way change current procedures for immediate readout of the mission.
